Applicant EUROFEU SOCIETE ANONYME et al.								
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 								
-	r ·							
3. This report is also accompanied by A	NNEXES, comprising:							
a. (sent to the applicant and	to the International Bureau) a total of	sheets, as follows:						
sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).								
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.								
b. (sent to the International.								
, containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).								
4. This report contains indications relati	ng to the following items:							
	\bowtie							
Box No. II Priority								
Box No. III Non-establi	shment of opinion with regard to novelty, invo	entive step and industrial applicability						
Box No. IV Lack of uni	ty of invention							
Box No. V Reasoned s								
	uments cited							
Box No. VII Certain def								
Box No. VIII Certain observations on the international application								
Date of submission of the demand Date of completion of this report								
Name and mailing address of the IPEA/EP	Authorized officer

	* If item 4 applies, some or all of those sheets may be marked "superseded."					

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/FR2004/000236

citations and explanations supp			ticle 35(2) with regard to novelty, inventive step or industrial applicability; pporting such statement	
1.	Statement			-
	Novelty (N)	Claims	1-10	YES
		Claims		NO
	Inventive step (IS)	Claims	1-10	YES
		Claims		NO
	Industrial applicability (IA)	Claims	1-10	YES
		Claims		NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: FR 803 340 A (PIQUEREZ EMILE) 28 September 1936 (1936-09-28)

D2: GB-A-1 478 602 (RAMPART ENG CO LTD) 6 July 1977 (1977-07-06)

D3: US-A-3 719 232 (GUBELA G) 6 March 1973 (1973-03-06)

D1, which is considered to be the prior art closest to the subject matter of claim 1, describes:

A fire extinguisher comprising a plastic vessel for containing a pressurised extinguishing agent and a propelling device attached to a neck of said vessel for controlling the propulsion of said extinguishing agent; which propelling device includes an outlet nozzle and a pick-up tube arranged in said vessel for leading the extinguishing agent from a portion at the bottom of said vessel opposite said neck to the outlet nozzle (reference is made to the relevant citations in the international search report).

Consequently, the subject matter of claim 1 differs from

International application No.
PCT/FR2004/000236

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

the fire extinguisher known from D1 in that a wall of said vessel has a helical internal rib of which the coil axis is substantially parallel to said pick-up tube.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The problem that the present invention is intended to solve can therefore be considered to be that of reducing, as far as possible, residual amounts of extinguishing agent.

The solution to this problem, as proposed in claim 1 of the present application, is considered to involve an inventive step (PCT Article 33(3)) for the following reasons:

Such a device is not suggested by the available prior art nor is it obvious. Moreover, the problem it solves has not been addressed. Hence no teaching is to be found in the prior art with regard to altering the known arrangements to produce a device as claimed.

Claims 2 to 10 are dependent on claim 1 and thus also comply, as such, with the PCT requirements of novelty and inventive step.
